## iSafari® Case Study – Arch Insurance

### The History...

Arch Insurance takes GAP insurance applications from agents and their clients via file downloads and paper forms. These methods required personnel to process each download or to manually key the paper forms into their business computer system on an iSeries.

### The Need...

Arch Insurance wanted to increase the number of applications taken and to improve data accuracy without hiring additional personnel. Their conclusion was to take data entry to the web which would give them real-time edits and lower the amount of hands-on work for employees.

### Enter iSafari® ...

Because Arch Insurance did not want to expose their iSeries directly to the internet, they took bids on several PC packages which could handle quoting insurance and taking applications. The cost of the packages was around \$80,000 with an approximate install of 6 months and data would have to be synced between the PC applications and the business system.

AdventureTech proposed using iSafari® to handle the project because it would allow real-time data interaction while keeping the iSeries out of direct contact to the web. The plan was to implement the project in 4 weeks with a cost of about a third of the PC packages.

## iSafari® Case Study – Arch Insurance

### The Post Mortem...

- Project was completed in six weeks using iSafari®.
  - Additional features extended project 2 weeks
- Secure, Real-time iSeries data access implemented
- Used existing quoting/billing system already in place
- Groundwork laid for future projects
- iSafari® total product/project cost - \$39,200.

### GAP Enrollment Portal

**ABC AUTO DEALER**

**Tim King**

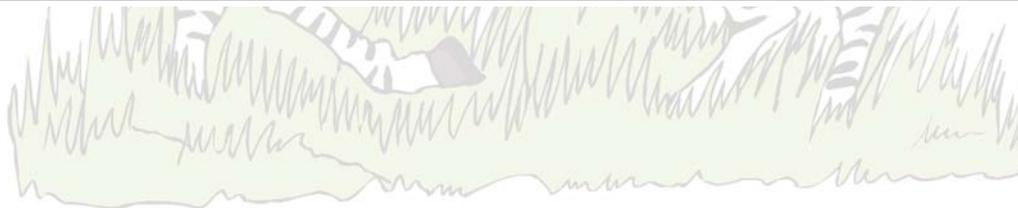

Welcome to the Arch Lender Products Division Internet GAP Enrollment Portal. This portal is designed to allow you to enter and manage enrollments to your GAP program via the Internet. In addition, you can print a waiver form, complete the invoicing process to the company and view or print previously created GAP waivers and invoices.

Below is the status of your current enrollment period. Please note any messages below concerning your invoicing status.

Current Enrollment Period Status	
Open Enrollments	None
Accepted Enrollments	None
Declined Enrollments	None

Please remember that no reimbursement coverage under your GAP master policy is available until the GAP enrollment has been submitted to the company and the proper funds have been remitted.
